

## CIRCULAR KNIVES. CUTTING RINGS

### Type SR

Outer-Ø (D) mm	Inner-Ø (d) mm
77	60
80	60 / 68
105	90
125	100
160	140 / 148
250	210

**Total thickness (S): from 0.5 mm**

**Other dimensions and materials on request.**

#### Standard materials:

chrome alloyed tool steel (1.5 % Cr), high chrome alloyed tool steel (12 % Cr)

#### Benefits:

- | highest slitting performance due to optimised surface quality
- | exact manufacturing tolerances
- | DIENES precision grinding „CONTROLLEUR“
- | usable for different machine types

**DIENES also manufactures suitable spacers, top and bottom knives, knife holders as well as manual, semi-automatic and automatic slitting systems.**
